REPORT TO THE SHAREHOLDERS

For the quarter ended January 31, 2000, Transat A.T. Inc. (the "Corporation") reported revenues in the amount of \$397.4 million, compared with \$363.5 million for the same period in 1999, an increase of 9.3%. For the period, the Corporation posted a net profit before goodwill charges of \$76,000, or \$0.00 per share, compared with a net loss before goodwill charges of \$2,231,000, or \$0.06 per share, for the quarter ended January 31, 1999. The net loss for the same period amounted to \$552,000, or \$0.02 per share, compared with a net loss of \$2,879,000, or \$0.08 per share last year. Results per share are calculated based on the weighted average number of shares outstanding of 32,730,182 for the first quarter of 2000 and 34,426,291 for 1999.

In the Canadian market, revenues rose 18% compared with the same period last year. The revenue growth recorded in the past several consecutive quarters in the Ontario and Western Canada markets carried on in the quarter ended January 31, 2000. The growth is primarily attributable to both a higher volume and price increases as a result of rising operating expenses, including fuel. Excluding the sharp drop in the euro against the Canadian dollar, revenues posted in France would have been up approximately 12%. Currency fluctuations aside, revenue growth was based on higher volumes and price increases.

This quarter was marked by a major event: the changeover to the Year 2000. From an operational standpoint, the Corporation did not experience a breakdown in its information systems. However, the changeover did have an impact on the number of people travelling during the year-end period. Indeed, many people apparently decided to postpone their Holiday Season travelling for a number of reasons. Transat's supply of vacation products and packages for this period therefore had to be adjusted and this generated downward pressure on profitability. This situation impacted the operation of all companies in the group, both in Canada and in France, as well as all tourism industry players in North America and Europe.

Despite the many events tied to the new millennium celebrations and their negative impact on its results, the Corporation's net loss in the first quarter has almost been eliminated as a result of the interaction of a number of factors. In Canada, the main factors that helped improve profitability were: the strengthening of the Canadian dollar against its U.S. counterpart, higher volumes and prices, as well as a drop in interest expense. In France, Look Voyages experienced higher selling

prices and an increase in volume.

The main factors that had a negative impact on results during the quarter were the following: higher fuel costs, an increase in operating expenses, the weakness of the euro against the Canadian dollar, and a decrease in load factors for certain subsidiaries.

As at January 31, 2000, the Corporation's cash and cash equivalents stood at \$197,791,000, compared with \$173,868,000 as at October 31, 1999. During the quarter, operating activities continued to generate a significant amount of cash, totalling \$52.8 million compared with \$35.1 million in the first quarter of 1999. The Corporation spent \$24.5 million in investing activities, mainly for a loan to a joint venture, deposits, as well as capital assets and spare parts. As well, \$4.4 million was used for financing activities, including \$5 million for the repayment of long-term debt, \$4.3 million for the redemption of shares as part of the normal course issuer bid, while the Corporation increased its bank loans and revolving term facility by \$4.9 million.

Based on the trends noted in the second half of the winter season, which will end on April 30, 2000, the Corporation is optimistic about the results for the first six months of the year. With respect to the summer season, the Corporation expects sustained competition, particularly for European destinations departing from Canada, although current indications point to an encouraging number of bookings, particularly for departures from Canada. Moreover, the high cost of fuel represents a major challenge for companies that operate in the travel industry, and the Corporation is closely monitoring this aspect of its operations that has a significant impact on its profitability. As well, in order to offset the larger-than-expected increase in the cost of fuel, the Corporation imposed a surcharge-as did its competitors-on departures from France for Canadian destinations, on domestic flights and on flights to sunshine destinations.

In Europe, the euro's decline against the dollar is having an impact on bookings for Canadian destinations departing from the euro countries (Germany, France, the Netherlands), although bookings are similar to last year's level for departures from the United Kingdom. This situation may be of particular significance for Vacances Air Transat (France), which specializes in Canadian and U.S. destinations. As for Look Voyages, the number of bookings for destinations in the Mediterranean region is very good and augurs well for the upcoming summer season, which is a crucial period for improving the financial results.

EVENTS SUBSEQUENT TO JANUARY 31, 2000

In February, the Corporation completed its acquisition of all the shares of Services Haycot and Brok'Air, in which it previously held a 50% and 39% stake respectively. And in March, the Corporation announced its intention to acquire all the shares of Consultour/Club Voyages, in which it already held a 50% interest. In this way, the Corporation will be better positioned to control the development of its interests and respond to future growth opportunities in a timely manner.

INTERNET-RELATED DEVELOPMENTS

Since the introduction of Internet technology in the travel industry, Transat has promoted the development of related activities among its subsidiaries, in particular the implementation of e-commerce operations. In France, Brok'Air set up a transactional site (anyway.com) that is already playing a leading role in the on-line distribution of airline tickets in the French market. Moreover, in Canada, the Corporation has introduced an on-line travel agency (exit.ca) which will soon be actively marketing the vacation packages and air transportation available from tour operators both inside and outside the group. These Internet activities are complementary to each other and are a natural extension of the principle of vertical integration applied by the Corporation.

Transat A.T. Inc. is an integrated company in the tourism industry. Through its subsidiaries and affiliated companies, it is active in every aspect of the organization and distribution of holiday travel: retail sales through travel agencies, organizing and distributing vacation packages through tour operators, air transportation, and hotel management.

Each member company of Transat specializes in its respective field. Together, they form a large holiday maker. They are all driven by the same corporate vision: offering quality vacation packages at affordable prices to an extensive clientele. Transat's objective is to maintain its position of leadership in Canada and to become a dominant player in the holiday travel industry in North America and Europe.
